

Seoul Mayors Forum on Climate Change 2016

Local Climate Commitments in Raising
the Ambitions of the Paris Agreement

Sep 1(Thu) – 2(Fri), 2016
Seoul City Hall, Republic of Korea

Welcome Message

The Year 2016 is a Climate change year. This Forum will outline how cities and local governments can support national and global efforts to raise the level of global ambition, to ensure a rapid entry into force of the Paris Agreement, and play an instrumental role in global climate advocacy towards COP22 in November 2016, also taking into account the progress achieved in the HABITAT III process.

We will explore with mayors and local governments what support is needed to help them respond to challenges, in particular also considering the new relevant frameworks : Nationally Determined Contributions(NDCs), SDGs and the New Urban Agenda. The Forum will provide an opportunity to explore a pathway to further develop cooperation among leading cities, with a view to helping raise the global climate ambition.

We look forward to your active participation and fervent support to make the forum more valuable.

Thank you.
